

 **breo roam watch**

look good, feel good

Simple but very effective! That's the new Breco lightweight sports watch with Minus Ion powder. Lightweight at 10g and water resistant, our watch will help balance the human body's electric symmetry by far infrared Ray and Minus Ion emitted from Minus Ion powder.

THE SCIENCE BEHIND OUR WATCHES

The Breco 'Roam' Watch is made with a material called Tourmaline. A naturally occurring mineral, widely used as a semi-precious gemstone that has unique electric properties responsible for many beneficial health effects. Tourmaline is known to generate a weak electric current, producing far infrared rays and converting moisture in the air to negative ions.

- LCD display
